

## BEST PRODUCTIVITY IN DUPLEX

*Color A3 MFP, 20-29 ppm*

The Duplex Productivity tests measure print speed onto both sides compared to the manufacturer's specified speed for single-sided printing. Many of this machine's competitors deliver duplex much more slowly.

Cesson-Sévigné, France on January 31st, 2018.

**DataMaster Lab** is completely independent and objective.

**DataMaster Lab** is the only European test laboratory specializing in the world of digital printing: printers, photocopiers, MFPs/MFDs, digital presses, and related software solutions. No revenue is derived from testing. All of the **DataMaster Lab** awards are derived from tests carried out by our own test teams.
