## DATAMASTER LAB AWARDS 2019

## BEST SCAN FILE SIZE

Color A4 MFP, 40-49 ppm

The output file size from multiple standardized scan tests varies a great deal. The smaller the better, for given resolutions - making document archiving and sharing more efficient.

Cesson-Sévigné, France on June 21st, 2019.

**Edward Bilson Technical Director** 

Frédérick van Gorkum

DataMaster Lab is completely independent and objective.

DataMaster Lab is the only European test laboratory specializing in the world of digital printing: printers, photocopiers, MFPs/MFDs, digital presses, and related software solutions. No revenue is derived from testing. All of the DataMaster Lab awards are derived from tests carried out by our own test teams.
